EDUCATION

B.E. in Information Technology , MCT's Rajiv Gandhi Institute of Technology	7.8/10 2023 - 2026
Diploma in Computer Engineering , Government Polytechnic Mumbai	82.58% 2020 - 2023
SSC 10th Board Examination , Anusaya Vidhyalaya	85.40% 2019 - 2020

EXPERIENCE

Android Developer Intern , Martyear Technology Pvt. Ltd. [Certificate]	Jan 2023 - July 2023
- Contributed to the development of a B2B marketplace Android app by building and maintaining RESTful APIs using PHP and MySQL. - Optimized database performance, ensured data integrity, and collaborated with the front-end team for smooth API integration. - Helped implement key features like payment gateway integration and real-time messaging to improve app reliability and user experience.	

PROJECTS

HealthMateX - Smart Health Companion App [Github]
Flutter, Firebase, MongoDB, Google ML Kit(OCR), Python(AI/Scikit)
- Developed a mobile app that uses OCR + AI-driven logic to extract and analyze 25+ key medical parameters from lab reports, providing instant insights for 15+ common diseases. - Built a secure dashboard with report history, 100% encrypted storage, and personalized recommendations, improving health awareness for users without medical expertise. - Optimized OCR pipeline to achieve 90%+ accuracy across varied report formats, ensuring reliable real-world performance.

WearYourDeign: Online Custom Clothing Brand [Github] [Live]
ReactJS, Next.JS, Express.JS, JavaScript, Vite.js, MongoDB, Stripe API, Postman
- Built a full-fledged e-commerce platform with an integrated admin panel for product management, inventory, and real-time order tracking. - Implemented custom T-shirt design features using canvas customization, html2canvas, and 3D mockups, enabling users to preview designs instantly before purchase. - Integrated Stripe API to handle secure online payments, reducing checkout friction and ensuring a 100% safe transaction flow.

Reado AI - AI Powered Readme Generator [Live]
Next.js, TypeScript, JWT, Python, FastAPI, MongoDB, GitHub API, Google Gemini API, WebSocket, Socket.io
- Developed an intelligent README generator leveraging Google Gemini AI to automatically create high-quality, context-aware README files from GitHub repositories, reducing manual documentation time by over 50%. - Integrated GitHub OAuth and REST API to enable seamless repository access, real-time file parsing, and automated pull request creation, streamlining developer workflows and boosting productivity by 30%. - Designed and implemented a secure JWT-based authentication system and a responsive, user-friendly UI using Next.js and Tailwind CSS, achieving an average README generation time of under 25 seconds and enhancing overall project setup efficiency.

SKILLS

Programming Languages: C, C++, Java, Python, JavaScript, TypeScript
Web/App Development: HTML, CSS, ReactJs + Vite, Flask, Fast API, NodeJs, NextJs, Flutter
Tools and IDEs: Git, GitHub, Figma, VS Code, Android Studio, Postman, AI Automation tools
Database: MySQL, MongoDB, Firebase, Google Cloud, AWS S3

CERTIFICATES

- Introduction to Generative AI Learning Path** - Google Cloud
- Java Programming Foundation Exam** (July 2023) - Study Section

EXTRA CURRICULAR ACTIVITES

Event Managent Secretary , ABIT, RGIT	July 2025 - Present
Lead coordination of departmental workshops, cultural fests, and technical events	
Joint Technical Secretary , Student Council, MCT's RGIT	Jan 2025 - May 2025
Organized annual technical fest ICARUS 2025 with 15+ flagship and contingent events
